

K A M I

STUDIOS

What has influenced KAMI Studios starts with its Japanese origins. KAMI means deity, divinity or spirit and is deeply connected with Nature. The vision for the space is to empower a creative ecosystem of complete synergy between our natural world and humanity. Nature is our muse, so designing products or displaying pieces that pay homage to her beauty and form, helps us establish the understanding that what we produce is more of a creative responsibility than just design. Perfection is rooted in nature and although we are taught to believe that nothing is perfect, we strive for excellence. For it's when our creative soul and competitive spirit become one, that we find the perfection in our existence. We believe that everyone was born to create.

We are committed to building our ecosystem with women and have devoted this platform to be a permanent pipeline for future female creatives and designers; investing, marketing and recognizing their masterpieces. To us, a creative is someone who gives life to the divine nature of something. KAMI becomes the beholder of that epiphany.
